Armrest Dynamic

Stop working. Start floating! Why let gravity wear you down? The Armrest Dynamic is the ultimate upgrade for your workspace. Designed with ultra-smooth, fully flexible joints, it mirrors your every move – making your arms feel weightless. By absorbing the weight of your forearms, it instantly takes away tension in your shoulders and neck. Whether you use one or a pair, you'll finish your day feeling refreshed.

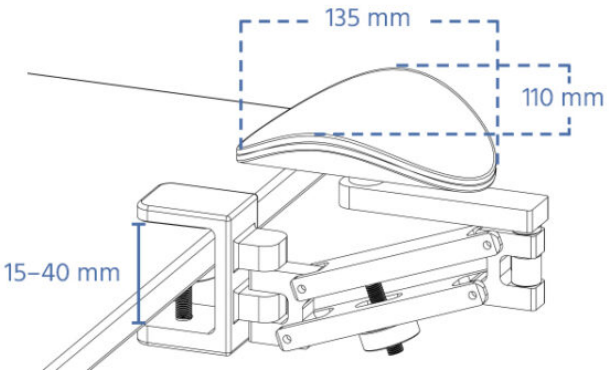

Benefits of Armrest Dynamic

In modern offices, fast-paced production lines, and demanding industrial environments, your body often pays the price for static positions. Constant tension in your arms, shoulders, and neck isn't just uncomfortable, it's an unnecessary distraction. The Armrest Dynamic is engineered to break that cycle. By transforming your forearm and elbow from "anchors" into "gliders," it eliminates unnecessary strain before the pain even starts.

The forearm rests comfortably on a soft support made from artificial leather that can rotate 360°. The two joints in Dynamics aluminium arm allows it to follow all your movements, providing support regardless of the position or motion of your arm.

The Armrest Dynamic is designed for high-performance and fits easily to desks using just a clamp and can be adjusted depending on your preferred position. It's suitable for tabletops that's 15–40 mm thick.

Facts

- Length: 180–365 mm
- Width: Dynamic
- Height: 120–180 mm
- Height above table: 30–90 mm
- Tabletop thickness: 15–40 mm
- Weight: 665 g
- Max load: 33 lb
- Product code: TB220

Note that it do not work on desks that have rounded edges, raised decorative trims, or on fragile materials such as glass.
